

800 Prompts

Touch	Action	Description
1	Playback	Touch 1 to playback the dictation from the beginning. Touch 7 to fast forward the playback by 7 seconds. Touch 0 to overwrite the recording at the point of playback.
2	Record	Touch 2 to continue recording.
3	Review	Touch 3 to review (playback) the last 5 seconds and immediately continue recording.
4	Pause	Touch 4 to pause recording and touch 2 to continue recording.
5	Complete	Touch 5 to complete the current dictation and begin a new dictation. The caller will again be prompted for the work type and patient id.
6	Go to end	Touch 6 to go to the end of the file.
7	Fast forward	Touch 7 to fast forward the playback by 7 seconds.
8	Go to beginning	Touch 8 to complete the current dictation and begin a new dictation. The caller will again be prompted for the work type and patient id.
9	Disconnect	Touch 9 to disconnect from TeleWave.
0	Overwrite	Touch 0 to overwrite the recording at the point of playback.
#	Skip prompt	Touch # to skip the prompt.
*1	Confirmation #	Touch * and 1 to hear the unique confirmation for the current dictation before touching 5 to end. This confirmation code can be used to locate a voice file on the dictation server.
*2	Overwrite Audio	Touch * and 2 to overwrite the audio at the last point of playback
*3	Insert Audio	Touch * and 3 to insert audio at the last point of playback.
*4	Set Priority	Touch * and 4 to set a priority. Immediately after pressing *4, the caller must touch a button between 1 and 3. 1 means high priority, 2 means medium priority (the default), 3 means low priority. For example, to set a dictation at high priority the caller will touch *41. By default all dictations are set at medium priority.
